CAL FIRE Sonoma-Lake-Napa Unit Suspends Burn Permits

St. Helena— California is entering its third consecutive dry year and braces for what could be another devastating [wildfire](#) season. While wildfires are a natural part of California’s landscape, the fire season in California and across the West is starting earlier and ending later each year. Climate change is considered a key driver of this trend. Warmer spring and summer temperatures, reduced snowpack, and earlier spring snowmelt create longer and more intense dry seasons that increase moisture stress on vegetation and make forests more susceptible to severe wildfire.

The increasing fire danger posed by dead grass and hotter, drier conditions in the region is prompting CAL FIRE to suspend all burn permits for outdoor residential burning within the State Responsibility Area of Napa, Lake, Solano, Yolo and Colusa counties. This suspension takes effect **May 23rd**, 2022, and bans all residential outdoor burning of landscape debris such as branches and leaves. **Burn permits for outdoor residential burning within the State Responsibility Area of Sonoma County are still allowed and required.**

CAL FIRE Sonoma-Lake-Napa Unit Chief Mike Marcucci would like to remind residents, whether working to create defensible space around your home or just mowing the lawn, if you live in a wildland area you need to use all equipment responsibly. Lawn mowers, weed-eaters, chain saws, grinders, welders, tractors, and trimmers can all spark a wildland fire. Do your part, the right way, to keep your community fire safe.

Since January 1, 2022, CAL FIRE and firefighters across the state have already responded to over **700** wildfires. While outdoor burning of landscape debris by homeowners is no longer allowed, CAL FIRE is asking residents to take that extra time to ensure that they are prepared for wildfires by maintaining a minimum of 100 feet of Defensible Space around every home and buildings on their property and being prepared to evacuate if the time comes.

The department may issue restricted temporary burning permits if there is an essential reason due to public health and safety. Agriculture, land management, fire training, and other industrial-type burning may proceed if a CAL FIRE official inspects the burn site and issues a special permit.

The suspension of burn permits for residential landscape debris does not apply to campfires within organized campgrounds or on private property. Campfires may be permitted if the campfire is maintained in such a manner as to prevent its spread to the wildland. A campfire permit can be obtained at local fire stations or online at PreventWildfireCA.org.
